EXPERIENCE

Tripadvisor - Remote
4/2022 - Present

Senior Software Engineer - Frontend

- Responsible for managing the entire Vacation Rental frontend which includes migrating core pages to a new platform.
- Developed, tested, and successfully deployed 10+ features resulting in an increase of revenue approximately by $1.5 million.
- Migrated the SRP and PDP by implementing advanced reactJS patterns, virtualization, and better localizations by creating a custom hook along with the lithium library.
- Focused on improving the performance of pages and reducing the speed Index by optimizing the component rerenders in the Carousel Component while also making them SEO-friendly by using SSR.

Loginext - Mumbai
6/2020 - 3/2022

Software Engineer - Frontend

- Responsible for UI migration from Angular to React which includes working on making a component wrapper for major features in the product which are Custom Templates, and Dynamic Listviews with Maps. Advanced Filter Search, Advanced Configurations Pages, and Client Onboarding Flows.
- End to End setup and development of UI Library using React.js, Typescript, Redux, HOC patterns, context APIs, render Components, and moment.js for handling time zones across the app
- Implemented React-leaflet for handling map markers and interactions, React-Portals for Toast messages, and global models.
- Used Styled-Components and ContextAPIs extensively for global themes across the web page. Implemented test cases using Jest and enzymes before publishing the libraries on npm.
- Mentored and assisted fellow developers and juniors on technical approaches and set up a review process in order to ensure coding standards.
- 30+ components were created to reduce the code base by 40% in the product.
- Conducted technical sessions for learning and knowledge sharing among fellow developers.

Unifynd - Mumbai
7/2019 - 5/2020

Full stack Developer

- Experience building API's in Node.js, Express.js, knex.js, and PostgreSQL.
- Experience with Vue js, Vuex, React and Redux, and graphQL and Nuxt.js for SSR.
- Identified ways to improve design and development, while building a quicker web experience.
- Participated in design reviews and provided input to design recommendations.

Pipa Bella - Mumbai
6/2017 - 7/2019

Front end Developer

- Responsibilities included developing clean interactive UI, and UX with functionalities that involve playing with data from the backend using jQuery, Vuejs with Magento framework, HTML5, and PHP.
- Core Team responsible for revamping the entire e-commerce website from Magento 1 to Magento 2 with a front end of React.js and redux
- Build various UI interactive games including canvas.js, GSAP, three.js

EDUCATION

Bachelors in Engineering in Computer Science - 7.8 CGPA
